Stack, Scan. Simple!

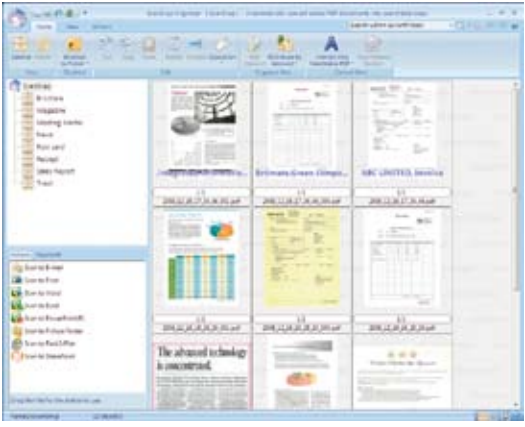

The portable ScanSnap S1300 provides Windows and Mac users the tools to be productive and paperless... anywhere – anytime.

Efficiently Manages Scanned Documents

- S1300 users can easily locate specific ScanSnap generated PDF and JPEG files by viewing displayed thumbnail images.
- Keyword searches can be performed on S1300 generated PDF file text.
- The S1300 creates searchable PDF files by performing OCR functions when the linked computer CPU is idling.
- **Intelligent Cropping**
This feature enables users to easily “cut out” digitised copies of newspaper and magazine articles that they have outlined on the original paper document with a highlight pen.

- **Intelligent Indexing**
This feature extracts text from sections of scanned images that have been highlighted. This index information can then be attached to PDF files as so called Meta Data.
