Document Scanners

fi-6800

- 130 ppm / 260 ipm at 300 dpi in colour and mono (A4 Landscape)
- New compact design
- Added features for even better automation powering efficiency
 - Patch Code and Barcode supported job separation
 - "Automatic Stacker" and "Automatic Image Quality Checker"
 - Excellent paper-feeding mechanism

The fi-6800 from Fujitsu. A unique and impressively fast A3 image scanner offering the best cost to performance ratio in the mid volume production class

The fi-6800 has been developed to provide a revolutionary solution for automation improvement, increased productivity, cost reduction and contribution to the environment whilst at the same time minimising time for the operator in both pre and post processing. Aimed at the mid volume document scanning markets, the fi-6800 offers high quality scanning performance and a compact ergonomic design.

Scanning speed and quality

The fi-6800 scanner can process documents speedily and reliably. In fact 130 pages per minute in mono, grayscale and colour and 260 images per minute in duplex (in A4 landscape mode) can be scanned at resolutions of up to 300 dpi. In A4 portrait mode the fi-6800 will comfortably scan in mono, grayscale and colour at 100 pages per minute and 200 images per minute at resolutions of up to 300 dpi. Optical resolutions of up to 600 dpi are achievable.

A typical daily throughput of 20,000 documents can be easily achieved and this duty cycle satisfies production level scanning requirements. If required, the fi-6800 is ready to process even up to 60,000 documents per day. The fi-6800 features custom made colour CCD image sensors and newly developed ultra bright white LED arrays as light source. This results in near-to-instant availability of the device after power-on.

The fi-6800 comes with a hopper that will take a maximum 500 A4 sheets at a weight of 80 g/m², ranging from 20 g/m² up to 209 g/m² (A4 – A5 format). The ADF hopper can handle mixed documents from as small as A8 (52 x 74 mm or 2 x 3 in) up to A3 (297 x 420 mm or 12 x 17 in) in size.

Compact and environmentally friendly

The hopper will fold away when not in use thereby helping to minimise the space taken up but also minimising the cleaning requirements of the scanner when compared with open devices. The fi-6800 reaches new heights when it comes to its compact nature. The footprint measures just 460 mm width by 430 mm depth enabling the device to sit comfortably on any desktop or office environment. Even its height compares favourably with other devices coming in at just 310 mm.

The fi-6800's new compact design makes it the smallest in its class taking up 53% less space and being 72% lighter than its predecessor.

Superior feeding and enhanced user experience

The fi-6800 supports new automatic functionalities that make scanner operating tasks even easier, faster and a lot more energy efficient.

 Group scan various documents with ease with Patch Code and Barcode recognition and 'Automatic Sorting'

The fi-6800 along with ScandAll Pro supports automatic job separation to help improve digitising efficiency. The bundled barcode and patch code reading functionality provides the ability to separate different jobs – or files – within the same batch. File and folder names can be created automatically. When using barcodes the herin encapsulated information can be used for file naming. This is additionally supported by ScandAll Pro triggering zonal OCR processes.

 Reduce the hassle of post-scan tasks with 'Automatic Stacker' and 'Automatic Image Quality Checker'

'Automatic Stacker' ensures all your scanned documents are stacked neatly and tidily while 'Automatic Image Quality Checker' detects any image irregularities (folds or tears in the scanned document) after scanning.

 An excellent paper-feed mechanism that guards against document damage and misaligned document feeds

The fi-6800 from Fujitsu features an incredibly reliable paper-feed mechanism which is derived from Fujitsu's top of the line fi-5900C model. Utilising fi-series renowned 'Paper Protection' function and 'Multifeed Protection' function paper feed problems are tackled before they happen thereby bringing optimised workflow to your business.

With this exceptional feeding mechanism that allows for mixed batch processing the need for timely uniform batch processing is eliminated as well as scanning delays and rescanning repercussions that come about as a result of paper jams and unknown double feeds.

Image enhancement

The fi-6800 offers the user hardware based deskew and auto cropping functionality. Deskew ensures that if documents are not placed in a straight edge format, they are straightened up as they are scanned. Auto cropping means that if mixed size documents are scanned, only the exact document area will appear on screen.

VRS Professional included

The fi-6800 comes with the full version of VRS Professional hardware that can be used for adding advanced image enhancement operations to the scanning process. These can be combined to receive digital document images that show high visual quality and require little or no additional manual interference. Some other features include intelligent content orientation recognition and auto-rotation.

Options

Post imprinters are available for the fi-6800 which enables users to print information on the original document for compliance and document management purposes. A post imprinter fi-680PRF can be utilised to print characters on the front page of scanned documents and an imprinter fi-680PRB can be utilised to scan characters on the backside of scanned documents. Both post imprinters can be mounted simultaneously and be used consecutively in different profiles. It is possible to combine the physical imprint with a corresponding virtual imprint on the image, thereby providing an easy means of cross reference.

There are two consumable kits available for the fi-6800; a single pack contains a pick roller, separator roller and a brake roller covering a maximum lifetime of 600,000 scans or one year. The twin pack contains two pick rollers, separator rollers and brake rollers covering a maximum lifetime of 1.200.000 scans or one year.

A cleaning kit for the fi-6800 will help optimise scanning and prolong the lifespan of your machine; the kit includes an F1 Pump Spray Cleaner, an F2 Pump Spray Cleaner and 75 Lint Free Cloths.

Software, interfaces and compatibility

With VRS professional supported by CGA hardware the fi-6800 also comes bundled with a host of software including Adobe Acrobat 9.0 Standard, ScandAll Pro, QuickScan Pro Demo and Scan to Microsoft SharePoint.

The fi-6800 can be operated through USB or SCSI interfaces, allowing for direct TWAIN and ISIS driver control. Additionally the operator can make use of VRS Professional image enhancement routines powered by a dedicated CGA board.

ENERGY STAR® compliant

Notes

- Actual scanning speeds are affected by data transmission and software processing times.
- JPEG compressed figures. *3 Maximum capacity varies, depending upon paper weight.
- Maximum output resolutions may vary, depending upon the size of the area being scanned and whether the scanner is scanning in simplex
- or duplex. You cannot use both SCSI and USB 2.0 interfaces at the same time.
- You cannot connect multiple computers to the scanner using each type of interface cables at the same time.
- 7 Excluding the ADF hopper.
 8 PFU Limited, a Fujitsu company, has determined that this product meets RoHS requirements (2005/95/EC).
- RoHS requirements (2005/95/EC).

 Capable of scanning documents that exceed A3 size in length. For long page scanning with standard I/F: Documents that exceed 432 mm (17in.) are limited to 400 dpi for lengths up to 863 mm (34in.). Documents between 863 mm and 3,048 mm (120in.) in length are limited to 300 dpi. Multi-limage documents up 432 mm in length are limited to 4000dpi. For long page. documents up 432 mm in length are limited to 400pd. For long page scanning with VRS: Documents that exceed 432 mm (171n), are limited to 300 dpi for lengths up to 1,778 mm (70in.). Documents between 1,778 mm and 3,048 mm (120in.) in length are limited to 200 dpi. Documents that exceed 432 mm can be scanned under any resolution for lengths up to 1,016 mm (70in.) when used with ISIS.
- 10 Without CGA board interface
